## MINEXCHANGE 2027 SME Annual Conference & Expo Call for Abstracts Now Open

*Thought Leaders Wanted for Industry's Most Comprehensive Technical Program*

Each year, a diverse array of international experts from operations, academia, and beyond come together to deliver an unrivaled technical program featuring the latest knowledge covering all aspects of mining. Join the leaders moving the industry forward by submitting a 100-word abstract [online](#) by **August 1, 2026**.

Areas of interest include bulk material handling, coal and energy, environmental, geology, valuation, tailings, diversity and inclusion, health and safety, industrial minerals and aggregates, mineral and metallurgical processing, and exploration. However, the program committee will consider abstracts covering any/all topics pertaining to the mining and minerals industry. As is SME's practice, abstracts should cover timely, innovative, and immediately useful information, practice, and developments important for competitive and effective operations.

"Submitting a quality abstract is your best opportunity to play a key role in shaping the world-class technical program at our flagship event," said Tara Davis, SME Content Development and Program Director. "We look forward to your contributions, which will make an impact on the thousands of attendees looking to advance their knowledge and professional development."

MINEXCHANGE 2027 will take place from February 28 – March 3, 2027 at the Colorado Convention Center in Denver, Colorado. For more information about MINEXCHANGE 2027, visit [smeannualconference.org](http://smeannualconference.org).
