## OneMine.org Receives Major Overhaul

The OneMine organization which represents the collective body of 14 international mining and mineral-related organizations in the world has launched an upgraded website for [OneMine.org®](https://www.onemine.org), the definitive global online digital research center for the entire mining, minerals and underground construction community.

“Making critical upgrades and improvements to OneMine.org® was a key initiative for us. We understand how deeply the mining community relies on this digital resource,” said David L. Kanagy, CEO and Executive Director of SME. “Not a day passes when I don’t hear from a member about the importance of OneMine.org®.”

Users visiting OneMine.org® will experience improved search with more accuracy and clarity; new enhanced search options, including topic, category, and submitting organization; and faster access to search results.

To support the transition to the new website, Krunal Patel takes the reins as the OneMine administrator, responsible for the functionality of the website, as well as working with content on a day-to-day basis. OneMine.org® partnering associations will work directly with Patel.

“I’m looking forward to continuing to develop this unique resource and bringing OneMine.org® to the mining industry for generations to come,” said Patel. “We are building on a strong body of work.”

First developed in 2007 by the [Society for Mining, Metallurgy & Exploration \(SME\)](#), OneMine.org® quickly grew to be one of the most relied-upon resources for mining professionals around the world. Today it's widely cited as one of the top global mining resources, with new documents added daily.

Over 130,000 technical documents from 14 global contributing associations reside in OneMine.org®. Content is free for members of contributing societies to access, or may be purchased on a per-document basis. There is also a subscription option available for private and nonprofit organizations.

Partnering associations include:

- ABM | Associacao Brasileira de Metalurgia, Materiais e Mineracao
- AIME | The American Institute of Mining, Metallurgical, and Petroleum Engineers
- AusIMM | The Australasian Institute of Mining and Metallurgy
- CIM | Canadian Institute of Mining, Metallurgy and Petroleum
- DFI | Deep Foundations Institute
- IIMP | Instituto de Ingenieros de Minas del Peru
- IOM3 | The Institute of Materials, Minerals and Mining
- ISEE | International Society of Explosives Engineers
- IMMS | International Marine Minerals Society
- NIOSH | National Institute for Occupational Safety and Health
- SAIMM | The Southern African Institute of Mining and Metallurgy
- SME | Society for Mining, Metallurgy & Exploration
- TMS | The Minerals, Metals & Materials Society
- WAIMM | The West African Institute of Mining, Metallurgy and Petroleum
