

RECOGNITION	The best single or dual-authored, peer-approved or peer-reviewed paper published during the twelve months preceding May 1 where the lead author is a member of the Institute under the age of thirty-five.
ESTABLISHED	<p>In 1945 in memory of Rossiter W. Raymond, consulting mining engineer, practicing lawyer, writer, editor, orator, theologian, teacher, and novelist. Dr. Raymond was a founder of the Institute and served as president (1872-1874), vice president in 1871 and 1876, secretary (1884-1911), and secretary emeritus (1911-1918).</p> <p>He was also an honorary member, regarded as the Grand Old Man of the Institute.</p>
THE AWARD FUND	Established through the efforts of Frederick Roeser, a member of the Legion of Honor Fifty-Year Members of the Institute, who contributed \$2,000. Colonel Arthur S. Dwight, president of the Institute in 1922, bequeathed approximately \$6,000 to the fund.
THE AWARD	The lead author under 35 years of age receives a cash prize of two-thousand five-hundred (\$2,500.00) dollars and a framed certificate bearing name, year, and paper title. If both authors are under 35, the cash award will be split equally and a framed certificate will be prepared for each. If the co-author is 35 or older when the paper was submitted, they receive a framed certificate bearing name, year, and paper title.
ADMINISTRATION OF THE AWARD	On August 13, 2011, to improve the pool of eligible candidates, the AIME Board voted to rotate administration of this award among the four AIME Member Societies, beginning with SME in 2012 to select a 2013 recipient, then AIST, SPE, TMS, and so on. Committee and voting will be determined by each Member Society. Designated Member Societies will prepare a list of eligible papers from their society and select a single recipient according to the guidelines below, including notification, production (except the check that will be mailed to Member Society staff from AIME staff for presentation), and presentation of the award. If a suitable recipient is not found or the committee cannot agree, no award should be conferred.
ELIGIBILITY	Single or dual-authored technical papers where the lead author is a member in good standing of one of the AIME Member Societies, under the age of thirty-five at the time the paper was peer-approved/reviewed to be published, and in one of the below publications during the 12 months plus preceding May 1 of the judging year.

PUBLICATIONS

SME	
Mining Engineering	Monthly
Minerals and Metallurgical Processing (from 2019: Mining, Metallurgy & Exploration)	Quarterly (Six times a year)
Tunneling & Underground Construction	Quarterly
Transactions (hard copy in SME Pubs. Dept.)	Annually in February
TMS	
JOM	Monthly
Journal of Electronic Materials (JEM)	Monthly
Transactions - A (TOC on TMS website)	Monthly
Transactions - B (TOC on TMS website)	Bi-Monthly
AIST	
Iron & Steel Technology, including Transactions	Monthly
SPE	
SPE Journal	Quarterly
Drilling & Completion	Quarterly
Production & Operations	Quarterly
Reservoir Evaluation & Engineering	Bi-Monthly
Projects, Facilities & Construction (online only)	Quarterly
Economics & Management	Quarterly
Journal of Canadian Petroleum Technology	Monthly

Around May 1st, Member Society staff reviews its journals and transactions from the previous 12+ months for technical papers that meet the above eligibility criteria. In steady state, the pool of nominees will come from the previous four years. If necessary, all papers eligible for the award are screened at the Member Society level so that only a maximum of two papers from each society are sent to the committee for review. AIME staff suggests compiling the eligible list annually and selecting the top two each year, so that the committee will only have to review up to eight papers once a Society has four years' worth in the pool.

VOITNG AND DECISION

The AIME president-elect will oversee the process and require a list of nominees and letter describing the qualities and contributions of the winning paper.

The award in any year will be made to the author, otherwise, eligible, of that paper which in the judgment of the Award Committee ranks highest in the following respects: a) Significance of the technologic content of the paper, b) Proficiency of organization of material and the presentation thereof, c) Quality of literary style. Not more than one award shall be made in any calendar year, but the committee may in its discretion determine that there shall be no award for a given year.

RATIFICATION AND COMMUNICATION	<p>A list of nominees, letter describing the qualities and contributions of the winning paper and PDF of selected paper is emailed from Member Society staff to AIME staff as soon as a decision is made for ratification by the AIME Board at its next meeting. AIME staff informs Member Society staff so that Member Society staff can notify recipient. Recipients will be recognized in their Member Society publication, e-News and/or website.</p>
PRESENTATION	<p>At recipient(s)' Society annual banquet the following year by an AIME trustee and recognized as an AIME award in related promotional material. Non-members can designate to receive the award at a specific Member Society function or just have it sent to them.</p>
FOLLOW-UP	<p>The Rossiter W. Raymond Memorial Award recipient is also eligible for the Alfred Noble Prize. The Noble Prize, administered by ASCE, is a joint award of the American Society of Civil Engineers, the American Institute of Mining, Metallurgical, and Petroleum Engineers, the Institute of Electrical and Electronics Engineers, the American Society of Mechanical Engineers, and the Western Society of Engineers. AIME staff will help the Raymond Award recipient submit the nomination to ASCE by May 1 of the following year. For more information on this award, see asce.org/career-growth/awards-and-honors/alfred-noble-prize.</p>
NEW AWARD CRITERIA FROM 2012	<p>Member Societies will administer this award on a rotating basis going forward, beginning with SME in 2012 to select the 2013 recipient, AIST in 2013 to select the 2014 recipient, SPE in 2014 to select the 2015 recipient, etc.</p> <p>It was then MOVED, SECONDED, and VOTED that the Raymond Memorial Award selection process be moved to the Member Societies to administer in rotation once every four years. The pool of nominees will come from the previous four years. The AIME president-elect will oversee the process and require a list of nominees and letter describing the qualities and contributions of the winning paper. The rotation shall begin in 2012 for selection of a 2013 recipient as SME, AIST, SPE, and TMS. The current AIME awards subcommittee will draft requirements for reporting.</p>
